**Regarding the cancellation of the
37th Oita International Wheelchair Marathon**

The Oita Meteorological Office announced a high wind storm warning for Oita City early this morning.

Upon patrolling the course before the race, we found fallen branches and puddles of water on the roads, which would obstruct the safe holding of the race. After consultation with the race's technical delegate (Chief Director, Executive Board, Japan Para Athletics), we officially cancelled the race at 7:00am on October 29th.
